

MASS

MANYA SHUTTERING SHEETS

WHAT MAKES US SPECIAL?

- Light weight
- High Strength & Hardness
- Impact resistance
- Wear resistance
- Surface is smooth, bright and clean
- Concreting and forming effect is good.
- Unbreakable.
- No absorption of moisture
- No deformation/warpage due to water absorption
- Very good stability of size (especially suitable for underground and damp environment)
- Acid and alkali resistant and corrosion resistant
- It doesn't need to do any preservative treatment both in using and storing, therefore do not pollute the concrete surface.
- The reusable time for Manya sheets is 20 times or more it has a long service life.
- Manya shuttering sheets do not need any mold releasing agent or oil therefore further saving the cost

Bigger sizes 5ft. x 10ft., 6ft. x 12ft. and other cut to size sheets also available.

	प्लाईवुड	मान्या शटरिंग शीट
कीमत	40-60 रुपये प्रति वर्ग फुट	78-90 रुपये प्रति वर्ग फुट
इसका उपयोग कितनी बार किया जा सकता है	3-5 समय अधिकतम	12-15 बार न्यूनतम यदि ठीक से उपयोग किया जाता है, तो इसे 25 बार से ऊपर उपयोग किया जा सकता है
जलरोधक	नहीं	हाँ
कील ठोकना	हाँ	नहीं
रिसाइकिलिंग	नहीं	हाँ
पर्यावरण की दृष्टि से सुरक्षित है	नहीं	हाँ
प्रति वर्ग फीट प्रति उपयोग रुपये में लागत न्यूनतम	8	5.7
प्रति वर्ग फीट प्रति उपयोग रुपये में अधिकतम लागत	13.3	5.3
अटूट	नहीं	हाँ

.....

COST ANALYSIS OF MASS

- MASS gives more than 25 repetitions; hence running cost is low. The final RCC work will get smooth finish with minor joint line which does not require plaster. With this system one can save @16 / sq. ft. if you don't do plaster and hence it is cost effective.

- MASS is made from special grade plastic and hence no chemical reaction take place nor the material stick to it. Because of this property you cannot get any patched on the RCC finish. Also the gap between two plates are so negligible that no water nor cement gets leaked out at the time of RCC & it gets curing from the bottom of the plate also, which enhance the final quality of RCC casting.

- By using MASS shuttering sheets one need not nail or apply oil to the plates before casting RCC. Leveling is also very easy as there is no warpage in the sheets Hence 30 % time is saved in assembling also while dismantling the same.

- All existing traditional scaffolding systems can be use MASS Shuttering sheets comfortably. You can cast Slab, Beam & Column, etc.

- MASS shuttering sheets is made from special plastics which are recycled and it's long lasting and gives more than 25 repetitions. It replace plywood's which consumes trees and M.S. which consumes iron ore from our planet earth.

- After every usage of MASS Shuttering ply one can easily clean the sheets by water. Where as in M.S. plate one have to apply oil to clean the M.S. surface plates.

- MASS Shuttering sheet if any breakage occurs by mishandling it can be very easily sealed by low voltage hot air gun.
